Express x-Safety™

Fleet safety initiatives

- **Timely pre inspection checks** - Pre inspection at the start of each trip to ensure truck is in a safe condition to ply. On-time scheduled maintenance after running certain kilometres
- **24/7 vitals monitoring** - Round the clock vitals monitoring of airbrake pressure, engine oil pressure, coolant level, temperature to ensure ideal driving conditions. Any alerts or exceptions handled on priority through our 24x7 control tower
- **Speed Governors** - speed governors installed in entire fleet to limit speed in accordance with government regulation (as per Road Transport and Highways Ministry's 2015 amendment to the Central Motor Vehicles Rules, 1989)
- **Autonomous braking systems** - autonomous braking systems are installed to ensure truck halts in case obstacles are sensed within braking distance
- **HSEQ Gadgets** - Vehicles with OEM Cabin with 3 point inertia seat belts for crew with head rest; PPT- personal protection tools for Drivers like-shoes, helmets, gloves, Glow Jackets, Goggles, Safety Baton, Safety tools like-Fire extinguishers, First aid box & OIL SLIPAGE KITS

Express x-SafetY"

Our Community Outreach

- Supported the construction of a senior secondary school for girls in Haryana state
- Significant contribution in the construction of Hyderabad Goods Transport Association Building and active participation in the running of the association. The association houses a training facility for CVL drivers & mechanics and is actively supported by Express Roadways, that promotes an industry-wide safe driving and preventive maintenance awareness
- Supporting the under privileged sections of the society by:
 - Sponsoring child education through an NGO – Spandana India
 - Sponsoring mass marriages
 - Active participation and trustee of a NGO sponsoring blind education and upkeep

Our Green Initiative

- Tree Plantation
 - Funding a NGO engaged in reforestation in the Haryana state
- E friendly reuse of consumed oil
- Moving to being a “Green Workplace” - maximizing the use of natural light in facilities
- Six Sigma Project with OEM (Tata Cummins) for increasing fleet energy efficiency
- Scheduled preventive maintenance and use of sophisticated CVL lubrication technology
 - Lower emissions.
 - Increased drain interval.
 - Reducing the carbon foot print.

Your success
is our
success !!
